QUESTION 1

What is an advantage of using SNMPv2c over using SNMPv1?

A. username parameter

B. get bulk command

C. get next command

D. 32 bit counters

E. authentication and encryption

Correct Answer: B

QUESTION 2

Network engineers want the ability to see a custom property when the cursor hovers over a node on the map. How do you enable this functionality in Orion NPM?

A. add custom property labels to the nodes in the map

B. enable the custom property for map display

C. set up a drill-down text box for nodes in the map

D. configure a custom tool tip for the nodes in the map

Correct Answer: D

QUESTION 3

The data center team requires that they be alerted if any of the servers in a remote site go down. However, they do NOT want to receive alerts when the remote site connection goes down. Which two configuration steps should you take within your network management system (NMS) to meet these requirements? (Choose two.)

A. set up alerts on server status

B. set up alerts on the remote connection status

C. set each of the servers as dependencies for each other

D. set up the remote connection as a dependency for each of the servers

E. set up alerts on the remote router status

Correct Answer: AD

QUESTION 4

You want to configure a device to send a message when a specific event happens and have Orion NPM send an email when it receives that message. Which two steps must you take to achieve this goal? (Choose two.)

A. configure Orion System Manager to trigger an alert when any type of message is received

B. configure the device to send the target SNMP trap to the Orion IP address

C. configure the Orion Web Console to trigger an alert when any type of message is received

D. configure a rule in the Orion Trap Viewer to trigger when the target trap is received

E. configure Orion SNMP Trap service to trigger an alert when a target Syslog message is received

Correct Answer: BD

QUESTION 5

Which two reporting requirements should you consider when specifying data roll-up settings for a network management system (NMS)? (Choose two.)

A. data encryption

B. data format

C. data granularity

D. monitoring coverage

E. data retention

Correct Answer: CE

QUESTION 6

What is the most reliable method of detecting network issues?

A. listening for SNMP traps

B. listening for Syslog messages

C. conducting SNMP polling

D. monitoring traffic with NetFlow

Correct Answer: C

QUESTION 7

The Orion NPM administrator wants users to see a different node details page for all Extreme Network switches. How

should the administrator implement this change globally for all accounts?

A. use the Account Manager and select the new node details page for each account

B. use the Views by Device Type to change the view to the new nodes page

C. use the Manage Views and limit the new Nodes Details view

D. use the Account Views to assign the view to the guest account

Correct Answer: B

QUESTION 8

Companies A and B have merged and are both using the 10.10.x..x /16 networks. Company A uses Orion NPM and would like to monitor two key servers within company B\\'snetwork. Which solution for this situation involves the fewest configuration steps?

A. use static NAT

B. use dynamic NAT

C. re-address company B\\'s network

D. use DNS for accessing the servers

Correct Answer: A

QUESTION 9

A network engineer has created a custom report in Orion NPM with the following parameters:

1.

Fields are set to "Node ID, Node Name, Average Response Time."

2.

Timeframe is set to "Last30 days."

3.

Summarization is set to "Month."

What is an accurate representation of what this report will display?

A. average response time for the last month on all devices and interfaces

B. average response time for the last month on all devices

C. average response time per day of the last month on all devices and interfaces

D. average response time per day of the last month on all devices

Correct Answer: B

QUESTION 10

You have created a new account in the Orion NPM website that requires that only nodes that contain the string \\'Core\\' in their hostname should be seen. Which two steps should you take in Orion NPM to accomplish this? (Choose two.)

A. add an Account Limitation based on Node Name Pattern

B. set the pattern to Core*

C. add an Account Limitation based on Machine Type pattern

D. set the pattern to *Core*

E. add an Account Limitation based on Single Network Node

F. set the pattern to *Core

Correct Answer: AD

QUESTION 11

Refer to the following configuration snippet of a Cisco IOS router: snmp-server community private RO 60 snmp-server host 192.168.15.4 private access-list 60deny 192.168.12.0 255.255.240.0 access-list 60 permit snmp 192.168.15.4

The network management system (NMS) IP address is 192.168.15.4, and it is receiving SNMP traps from the router, but it is not able to poll the router. Why is the NMS unable to poll the router?

A. SNMP is not enabled on the router.

B. No public community string is configured.

C. The access-list is denying SNMP access from the NMS.

D. The NMS requires a read-write community string.

Correct Answer: C

QUESTION 12

How can the Universal Device Poller (UnDP) be launched?

A. as an executable application

B. from the web console if advanced options are enabled

C. from the web console if you are the administrator

D. by right clicking on any device name in Orion

Correct Answer: A
