### QUESTION 1

When troubleshooting backup operation issues, which status code indicates that the start window was closed?

- A. 96
- B. 71
- C. 196
- D. 1

Correct Answer: C

---

### QUESTION 2

Which parameter in NetBackup Management > Host Properties must be modified to change the logging level to 5 for the NetBackup client named clientl.example.com?

- A. set the "Global logging level" in the master server host properties.
- B. set the "Global logging level" in the client host properties.
- C. enable "Logging for critical processes" in the master server host properties.
- D. enable "Logging for critical processes" in the client host properties.

Correct Answer: A

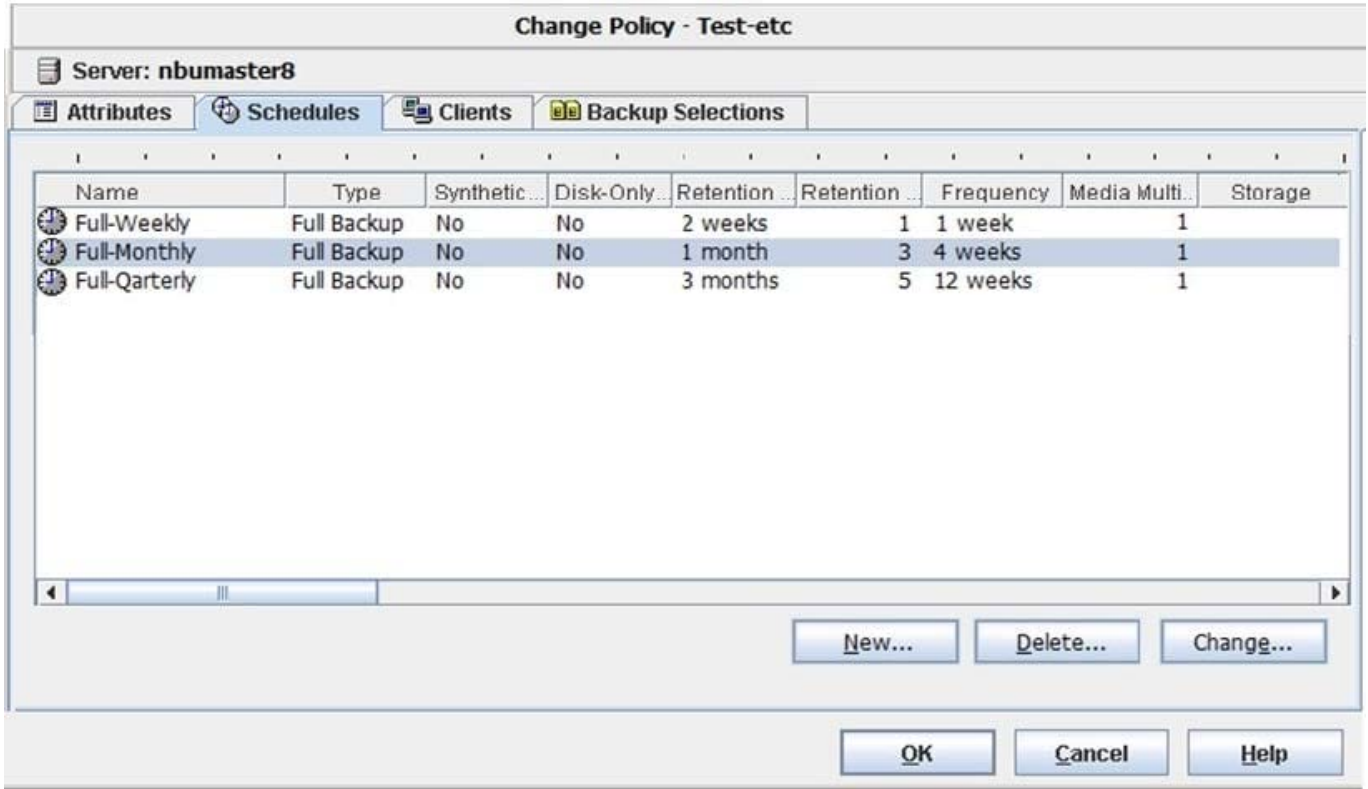

---

### QUESTION 3

Refer to the Exhibit.

An administrator has created a policy that has three new Full schedules as shown in the exhibit. All the schedules are set to run on Friday, from 0200 to 0600.

What is the order of priority for the schedules on Friday?

- A. Full-Quarterly > Full-Monthly > Full-Weekly
- B. Full-Weekly > Full-Monthly > Full-Quarterly
- C. Full-Monthly > Full-Weekly > Full-Quarterly
- D. Full-Quarterly > Full-Weekly > Full-Monthly

Correct Answer: B

#### QUESTION 4

An administrator has a backup for client Linux1 using the LinuxClients policy complete successfully. Even though the policy Backup Selections are NOT modified, the backup job fails the next day with the following status code:

Error 71: none of the files in the file list exist.

What is a possible reason the job failed?

- A. The "\\Enable granular recovery" option was unset.
- B. The client was added to another backup policy.
- C. The file systems have been unmounted on the client.
- D. The client was temporarily shut down.

Correct Answer: C

#### QUESTION 5

Which two have a media and/or density type? (Choose two.)

- A. volume pools
- B. media set
- C. drives
- D. drives
- E. robots

Correct Answer: CD

---

#### QUESTION 6

The NetBackup Resource Broker (NBRB) maintains resource requests for jobs that are queued.

Which two criteria does NBRB use to evaluate the resource requests and provide resources to each job sequentially? (Choose two.)

- A. job priority
- B. retention level
- C. time when NBRB receives the request
- D. data classification rank ID
- E. date of last successful backup

Correct Answer: AC

---

#### QUESTION 7

A job fails with the following message:

```
Error bpbwm (pid=5942) Cannot connect to winclient.example.com
Info bpbkar (pid=0) done. status: 58: can't connect to client
```

The administrator verifies the default OS host name resolution order is in place in all the environments, but finds an incorrect entry for the client in the media server's hosts file and corrects it. The hosts file on the client is properly configured.

The administrator restarts the job, but the job fails with the same error message.

Which action should the administrator perform to ensure the job completes successfully?

- A. Run `bpcIntcmd -clear_host_cache` command on the media server.
- B. Create a DNS record for the client.
- C. Restart the NetBackup services on the client.
- D. Restart the NetBackup services on the master server.

Correct Answer: A

---

#### QUESTION 8

Which method is NOT able to provide performance information for previously run backup jobs?

- A. running the All Log Entries report.
- B. running `nbperfchk` on the command line.
- C. viewing the detailed status of the job details in the Activity Monitor.
- D. viewing the Disk and Tape Device Activity Reports in OpsCenter.

Correct Answer: D

---

#### QUESTION 9

What are two ways to include files for scheduled backups? (Choose two.)

- A. Specify files to back up using Data Classifications.
- B. Use Client Properties > Windows client > Exclude list Exceptions.
- C. Specify files using the Backup, Archive, and Restore interface.
- D. Use storage lifecycle policies to specify files to back up.
- E. Specify files to be backed up in the policy backup selections.

Correct Answer: BE

---

#### QUESTION 10

Which storage unit type supports a staging schedule?

- A. BasicDisk
- B. PureDisk
- C. AdvancedDisk

D. Cloud Storage

Correct Answer: A

---

#### QUESTION 11

What should be selected as the source in the BAR console for a restore of individual files backed up using a VMware policy?

- A. The hostname of the VM.
- B. The media server that backed the client up.
- C. The VMware backup host that performed the backup.
- D. The identifier for the VM used in the VMware policy.

Correct Answer: D

---

#### QUESTION 12

In the case of a NetBackup appliance, which of the following is true of the storage server?

- A. It must be a separate NetBackup media server.
- B. It is the system with the NetBackup plug-in installed.
- C. It must be the NetBackup Master server.
- D. It is the NetBackup appliance.

Correct Answer: D

---

#### QUESTION 13

Which statement is true about NetBackup OpsCenter?

- A. An instance of OpsCenter is required for each NetBackup master server.
- B. OpsCenter is required to manage and monitor NetBackup.
- C. OpsCenter is the built-in interface to manage NetBackup.
- D. OpsCenter is the NetBackup management and monitoring GUI.

Correct Answer: D

---

#### QUESTION 14

A NetBackup policy is configured to back up the following paths for a client:

```
D:\stage  
E:\data  
E:\home  
F:\production
```

Multi-streaming is enabled for the backups, and multiplexing is set to 4. Backup streams are running slowly.

Which step should the administrator consider to improve backup performance?

- A. increase the multiplexing level.
- B. back up only one stream from each physical device on the client.
- C. disable multistreaming.
- D. increase the number of data buffers.

Correct Answer: B

---

#### QUESTION 15

What is a logical destination for NetBackup client's backup data?

- A. Selection List
- B. Storage Unit
- C. Policy
- D. Catalog

Correct Answer: B

The logical destinations for a NetBackup client's data include storage units, storage unit groups, and SLP.
