A. VMware VIX API

B. VMware VADP

C. SCSI hot-add capability

D. NFS client

Correct Answer: B

https://helpcenter.veeam.com/docs/backup/vsphere/transport_modes.html?ver=

QUESTION 2

A company has been running off replicated, business-critical VMs at their disaster recovery location since an earthquake near the primary data center occurred. Since the threat has passed, they want to stop the replicas and switch to the VMs at the primary data center without losing data. Which of the following actions is the first step they should take?

A. Failover

B. Permanent failover

C. Commit failback

D. Failback to production

E. Planned failover

F. Undo failover

Correct Answer: D

QUESTION 3

It was decided to set up Veeam Backup and Replication to ensure parallel tasks do not impact production storage availability. Which parameters should be adjusted in the I/O Control section of the menu to do this? (Choose the 2 appropriate options)

A. Throttle I/O of existing tasks at:

B. Turn off parallel processing at:

C. Stop assigning new tasks to datastore at:

D. Stop processing until the latencyis lower than:

Correct Answer: AC

QUESTION 4

Which HPE SAN storage systems are supported by the Backup from Storage Snapshot feature in Veeam Backup and Replication? (Choose the 3 appropriate options)
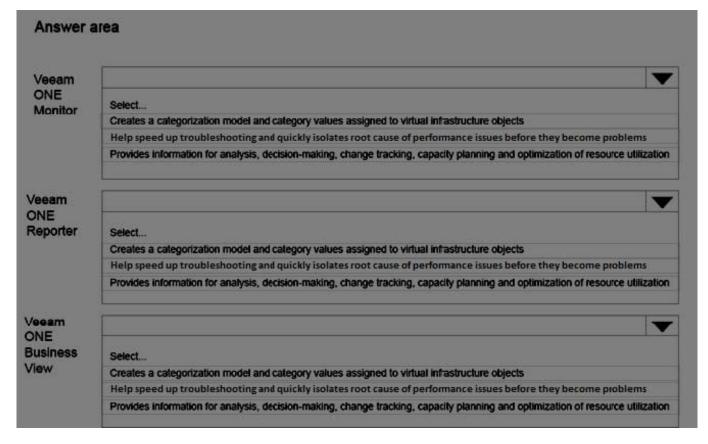

A. HPE StoreVirtual

B. HPE EVA 6000

C. HPE MSA

D. HPE StoreVirtual VSA

E. HPE StoreServ

Correct Answer: ADE

QUESTION 5

Match each Veeam ONE component with the correct description of its functions.

Hot Area:

Correct Answer:

Answer area
4 / 8

Veeam ONE Monitor

Select...
Creates a categorization model and category values assigned to virtual infrastructure objects
Help speed up troubleshooting and quickly isolates root cause of performance issues before they become problems
Provides information for analysis, decision-making, change tracking, capacity planning and optimization of resource utilization

Veeam ONE Reporter

Select...
Creates a categorization model and category values assigned to virtual infrastructure objects
Help speed up troubleshooting and quickly isolates root cause of performance issues before they become problems
Provides information for analysis, decision-making, change tracking, capacity planning and optimization of resource utilization

Veeam ONE Business View

Select...
Creates a categorization model and category values assigned to virtual infrastructure objects
Help speed up troubleshooting and quickly isolates root cause of performance issues before they become problems
Provides information for analysis, decision-making, change tracking, capacity planning and optimization of resource utilization

QUESTION 6

Which of these statements regarding initial configuration are true? (select two)

A. It is possible to limit read throughput (egestion rate) on a backup repository.

B. When deploying a backup proxy it is recommended to use as many concurrent tasks as server resources and backup target can handle.

C. It is possible to limit write throughput (ingestion rate) on a backup repository.

D. VMware vCloud Director 1.5 or later are supported when adding a managed server.

E. Microsoft Hyper-V 2008 or later are supported when adding a managed server.
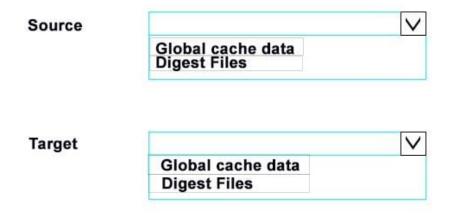

Correct Answer: CE

QUESTION 7

In the VeeamWAN folder created by the Veeam Backup and Replication WAN accelerator, select the correct type of source and target data stored in the VeeamWAN folder:

Hot Area:

Answer Area

Source

| Global cache data |
| Digest Files |

Target

| Global cache data |
| Digest Files |

Correct Answer:

Answer Area

Source [Global cache data / **Digest Files** ▼]

Target [**Global cache data** / Digest Files ▼]

QUESTION 8

Offloading backup files to the capacity tier of a scale out repository can be done automatically by leveraging what type of job?

A. Archive Job

B. Offload Job

C. Backup Copy Job

D. Backup Job

Correct Answer: D

QUESTION 9

A customer has a physical proxy configured for Direct Storage Access without failover to network mode. The backup fails. What could be the issue?

A. The disks being processed are IDE and/or SATA

B. The datastores are properly zoned and exposed to the proxy server but in read-only mode

C. The storage is not added into the storage infrastructure, inside the backup and replication console

D. Write access has not been enabled on the SAN

E. One or more of the VM disk(s) are on Wols

Correct Answer: E

QUESTION 10

Which services are installed on every Veeam Backup Proxy server? (Choose the 2 appropriate options)

A. Veeam Installer service

B. Veeam Backup service

C. Veeam Backup Catalog service

D. Veeam Data Mover service

Correct Answer: AD

QUESTION 11

Which are valid virtual lab configurations for both Microsoft Hyper-V and VMware vSphere? (Select two)

A. Basic Single-Host

B. Advanced Single-Host

C. Basic Multi-Host

D. Advanced Multi-Host

E. Enterprise Multi-Host

Correct Answer: AB

QUESTION 12

What other recovery mechanism can be used to restore quest os files if the virtual machine guest os file system is not supported by Veeam Backup and Replication Windows Instant File Level Recovery or Multi-OS File Level Recovery?

A. File level recovery would not be possible

B. Request a hotfix from Veeam Support

C. Leverage Instant VM Recovery

D. Use Extract Utility

Correct Answer: D

QUESTION 13

Which compression level is used by VeeamZIP?

A. No compression is used

B. Always High

C. Compression is optional

D. Always extreme

E. Always Optimal

Correct Answer: C

QUESTION 14

Select the correct description of a synthetic full backup.

A. A synthetic full backup will generate a new VBK file by getting data from the hypervisor

B. A synthetic full backup combines a VIB file with one or more VBK files from a repository to generate a new VBK file

C. A synthetic full backup combines a VBK file with one or more VIB files from a repository to generate a new VBK file

D. a synthetic full backup will update the existing VBK with data from the hypervisor and generate a new VRB file

Correct Answer: A

Reference: https://helpcenter.veeam.com/docs/backup/hyperv/synthetic_full_backup.html?ver=100

QUESTION 15

Which Veeam Backup and Replication feature can be used to keep the production VM online while the production host is patched?

A. Replica seeding

B. SureReplica

C. Failback of the Replica VM

D. Planned Failover of the Replica VM

Correct Answer: D
